TALNOVA

EDUCATION THAT ELEVATES

SUSTAINABILITY

SMALL CHOICES. BIGGER CHANGE.

PEOPLE.
PLANET.
PROGRESS.
TOGETHER.

Use less. Waste less. Make better choices.

Sustainability means considering the long-term impact of our choices on people, resources and the environment. Small practical changes matter alongside wider action.

01 REDUCE BEFORE RECYCLING

The best waste is waste avoided.

- Take only the materials you need. Use digital resources where practical and print only what is necessary.
- Choose reusable items when suitable and keep equipment in use for longer.
- Always consider if the task could use fewer resources.

02 REUSE AND RECYCLE CORRECTLY

Check the bin before you put it in.

- Follow the recycling labels and local arrangements.
- Keep food and other contamination out of recycling.
- Reuse supplies safely and report damaged equipment.
- Batteries, electrical items and hazardous waste need appropriate disposal, not ordinary bins.

03 SAVE ENERGY AND WATER

Switch off waste, keep safety on.

- Switch it off – Turn off lights, screens and equipment when you're finished, if it's safe and you're allowed to.
- Save water – Turn off taps properly and report any leaks.
- Use energy wisely – Keep doors and windows closed when the heating or air conditioning is on.

04 TRAVEL THOUGHTFULLY

Choose what works for your situation.

- Walk, cycle, use public transport or share journeys when safe and practical.
- Remember that everyone's circumstances are different. Choose what works for you and respect others' choices.
- Could you make one journey more sustainable each week?

05 SUSTAINABLE WORK PRACTICES

Build good habits into your role.

- Build sustainable habits during your learning and practical activities.
- Keep your learning environment clean, safe and hygienic while reducing waste wherever possible.
- What could you do differently today to make your academy more sustainable?

06 TURN IDEAS INTO ACTION

Learn. Suggest. Measure.

- Choose one realistic improvement in your learning area or workplace.
- Agree a starting point, try a change and review the result. Share ideas with your tutor or manager.
- Always consider less printing, reducing material waste, and repurposing product.

Lets make a greener tommorow

Spot a change this week.

- ☑ **Spot waste.**
- ☑ **Suggest a practical improvement.**
- ☑ **Involve others.**
- ☑ **Review what changed.**

Build sustainability into your skills, learning and future work.

Brighter futures together.
